MD-4 Multi-position Tape Feeder & Puller

MD-4

MD-4 is a multi-position tape feeder & puller, which can feed or pull the tape to the sewing machine in different angles and directions, no matter upward, downward or lateral.

Therefore, it is applicable to any machine.

The rotational direction can easily be changed to feed or pull the material by a switch.

Feed Downward

(The folder is not included in MD-4. It is a tailor-made product, which depend on your tape & finished size.)
